

Notes:

1. NCC experienced 18 minutes of service loss due to an equipment failure. SWO failed over the backup equipment.
2. Wallops 9m was unable to transmit 8 mins of 900kb data off station, reason unknown. Suspect bad bit sync load.
3. PFRR experienced 4 minutes of data loss due to RFI and 4 minutes of data loss due to a receiver failure.
4. WSC experienced 158 minutes of data loss due to a W5EXC failure/McMurdo vector, a TDRS command interruption caused by an ADPE cluster transition, and a failed MAR-2.
